I don't have any further comments to offer either

Thanks,

Larry.

Ruben shared a draft with me earlier today and I provided comments (that have been incorporated into this version). Lucinda, Kaytrue, and Larry: you provided helpful input over the last week, and we want to make sure that what you said previously was accurately captured in this revised briefing sheet. Please let us know if you spot anything that needs to be corrected.

Subject: RE: TX SO2 Nonattainment Area Options

I drafted the attached a fact sheet based on the review team email responses (below) to make it easier for our managers to use when talking with TX.

I wanted y'all to see it to make sure we have characterized the requirements accurately. Please review & edit the fact sheet as needed. Thanks. -Ruben

The review team email response summary is below – FYI.

To have a discussion with the State on options, we need to clarify what we need for a clean data determination, redesignation request & a limited maintenance plan. Details on what action/information we need from the state & what we can do ourselves.

We also wish to clarify what would need to be done for the modeling/emissions data options for demonstrating attainment or making a clean data determination. We discussed making a finding based on emission inventory changes, evaluating existing modeling and drawing conclusions on air quality with the shutdown, or rerunning the model with updated emissions.
